

FAST

Devices respond instantaneously, without the the latency of cloud-dependent hubs

RELIABLE

Automations are not cloud-dependence means do they work even when the internet doesn't

PRIVATE

Device and usage data is stored locally on the hub, not in the cloud

VERSATILE

Set up almost any automation using the built-in automation apps

COMPATIBLE

Works with Zigbee, Z-Wave, Lutron, LAN and cloud-connected devices

Elevate Your Business

Hubitat Elevation is a fast, reliable smart home platform that works with most devices. Hubitat Elevation is a versatile, customizable environment that allows you to build both simple and complex automations to satisfy even your most demanding clients. All automations are powered locally on the hub creating a secure environment that your customers can count on to keep their automations working without depending on the internet.

Hub Features

- Built-in Zigbee and Z-Wave radios
- Ports for LAN and cloud-connected devices
- Lutron device integration
- Custom dashboards
- Built-in drivers for most popular smart devices
- Custom dashboards allow homeowner to control and monitor their smart devices from their phone tablet or PC
- Smartphone app offers device control and acts as a presence sensor
- Small, stylish hub that fits almost anywhere

Hub Specs

- Dimensions: 75 x 75 x 17 mm
- CPU: Quad Core @ 1.55 GHz
- Memory: 8 GB Flash
- 1 GB RAM
- Z-Wave: Silicon Labs SLUSB001A - Z-Wave 700 UZB-7 USB Stick (868.4 MHz)
- Zigbee: IEEE 802.15.4 in the 2.4GHz band internal radio
- Power Supply: 110-240V to 5V @ 1A
